04/07/2015		Volkswagen	Manufacturer Safety Recall issued - NHTSA #14V656 - Recall #42G8 REAR AXLE TRAILING ARM INLAY INSTALLATION - Status: Remedy Available Locate an authorized Volkswagen dealer to obtain more information about this recall ⊖ Learn more about this recall
<p>Description: This recall does not address a vehicle design or manufacturing defect; rather, the potential for this defect to be present can only occur after your vehicle has sustained damage to rear axle components as described below, and only if the damage is not properly repaired. Our records show that you are the owner of a vehicle that could possibly be affected by this issue...If your vehicle had sustained damage to rear axle components (from a rear or side-rear impact crash or after striking a high road obstacle while driving in reverse at higher speed) and a repair facility did not correctly diagnose/repair rear axle trailing arm damage, the durability of the trailing arm(s) could be reduced. This can lead to a sudden fracture of the trailing arm, a loss of vehicle control, and a crash without warning.</p> <p>Remedy: Volkswagen will inspect the rear axle and install a sheet metal inlay on the rear axle trailing arms.</p>

02/25/2019		Nevada Motor Vehicle Dept. Las Vegas, NV	Registration issued or renewed
08/27/2019		Volkswagen	Manufacturer Compliance Recall issued - NHTSA #19V615 - Recall #37M2 MICRO SWITCH - Status: Remedy Available Locate an authorized Volkswagen dealer to obtain more information about this recall ⊖ Learn more about this recall

Description: Over time, a build up of silicate on the shift lever micro switch contacts can result in an isolation like layer that may be interpreted as an open micro switch. This open switch normally indicates that the shift lever is in P park position. If the build up happens, it may be possible to remove the key from the ignition switch without the shift lever being in the P park position because the system is unable to recognize that the vehicle is not in P park. This makes the vehicle noncompliant with FMVSS 114 Theft protection and rollaway prevention. If the ignition key is removed without the shift lever being in P Park position, there is a risk that the vehicle may roll away, resulting in a crash that could injure people and damage property.

Remedy: Install an additional switch and circuit board.

Glossary

Damage Indicator

Damage can be a result of many different types of events. Examples include contact with objects (other cars, trees, traffic signs, road debris, etc), vandalism, or weather-related events. Not every damage event is reported to CARFAX. As details about the damage event become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 11/6/24 at 5:58:41 PM (CST). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Damage Severity

Damage events result in one of the following severity levels:

- **Minor:** Generally, minor damage is cosmetic (including dents or scratches), may only require reconditioning, and typically does not compromise a vehicle's operation and/or safety.
- **Moderate:** Moderate damage may affect multiple components of the vehicle and may impair the vehicle's operation and/or safety.
- **Severe:** Severe damage usually affects multiple components of the vehicle and is likely to compromise the vehicle's operation and/or safety.

CARFAX recommends getting a pre-purchase inspection at a certified collision repair facility.

Failed Emissions Inspection

The emissions check performed during a vehicle inspection indicated the vehicle was emitting more than allowable emissions standards and/or had missing or modified parts. Repeated failed emissions records can indicate engine problems and CARFAX recommends you have the vehicle inspected.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in

the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Rental

Vehicle was registered by a rental agency.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
