05/23/2016		Nissan North America Inc.	Manufacturer Safety recall issued - NHTSA #16V-244 - Recall #R1609 MAX ALT RG MUR OCS NTB16-052 - Status: Remedy Available Locate an authorized Nissan dealer near you to obtain more information about this recall 🔍 Learn more about this recall
<div style="border: 1px solid #0070C0; padding: 10px;"><p>Description: The Occupant Classification System (OCS) is designed to classify the size and weight of the front seat passenger and, under certain conditions, automatically turn OFF the passenger air bag. The OCS system is designed to only deploy the front passenger airbag when the front passenger seat is occupied by an adult. In the affected vehicles, the OCS software may incorrectly classify the passenger seat as empty when it is occupied by an adult. If the OCS does not detect an adult occupant in the passenger seat, the passenger airbag would be deactivated.</p><p>Failure of the passenger airbag to deploy during a crash (where deployment is warranted) could increase the risk of injury to the passenger.</p><p>Remedy: The OCS software will be reprogrammed to reduce the potential for classifying the seat as empty. This reprogram will be offered at no charge to the customer and should take less than an hour to complete. Your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.</p></div>			
12/08/2016		Nissan North America Inc.	Manufacturer Service Campaign issued - Campaign #PC490 ALT RGE CVT P0776 NTB16-121 - Status: Remedy Available Locate an authorized Nissan dealer near you to obtain more information about this campaign 🔍 Learn more about this campaign
<div style="border: 1px solid #0070C0; padding: 10px;"><p>Description: Under specific driving conditions, hydraulic pressure may decrease and result in belt slip within the CVT. This may result in MIL illumination. Continuing to drive the vehicle in this condition can lead to accelerated wear and damage to the CVT.</p></div>			

Nissan is proactively reprogramming the Transmission Control Module (TCM) with updated CVT software to prevent decreased hydraulic pressure and belt slip from occurring. This is not a safety issue, and the vehicle still meets and/or exceeds all applicable safety standards.

Failure to have this reprogramming performed in a timely manner could result in future damage to your vehicle's transmission. If repair or replacement of the transmission becomes necessary outside of the powertrain warranty period, the resulting repair costs will be at the owner's expense.

Remedy: To assure your continued satisfaction and confidence in your vehicle, and prevent possible future damage to the CVT, your Nissan dealer will reprogram the Transmission Control Module (TCM) at no charge to you for parts or labor. The service should take less than one (1) hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

06/23/2021		Nissan North America Inc.	Manufacturer Safety recall issued - NHTSA #20V-315 - Recall #R21A6 ALTIMA HOOD LATCH NTB21-055 - Status: Remedy Available

Locate an authorized Nissan dealer near you to obtain more information about this recall

 [Learn more about this recall](#)

Description: IF A VEHICLE IS DRIVEN WITH THE PRIMARY HOOD LATCH DISENGAGED, (AND THE HOOD PARTIALLY OPENED), THE SECONDARY HOOD LATCH MAY BECOME CONTAMINATED WITH DIRT OR CORROSION. IF THE SECONDARY HOOD LATCH IS NOT PROPERLY INSPECTED AND MAINTAINED, SUCH DIRT OR CORROSION COULD THEN PREVENT THE SECONDARY HOOD LATCH FROM ENGAGING PROPERLY.

IF YOUR VEHICLE IS DRIVEN WITH THE PRIMARY HOOD LATCH DISENGAGED (AND THE HOOD PARTIALLY OPENED), THE SECONDARY HOOD LATCH ON YOUR VEHICLE MAY BECOME CONTAMINATED WITH DIRT OR CORROSION. SUCH DIRT OR CORROSION COULD THEN PREVENT THE SECONDARY HOOD LATCH FROM ENGAGING PROPERLY. IF THE PRIMARY HOOD LATCH IS LATER INADVERTENTLY RELEASED (SUCH AS WHEN REFUELING THE VEHICLE) AND THE SECONDARY HOOD LATCH, AFTER HAVING BEEN OPENED, REMAINS STUCK IN THE OPEN POSITION, THE HOOD MAY OPEN WITHOUT WARNING WHILE DRIVING AND COULD OBSCURE THE DRIVER'S VISION, INCREASING THE RISK OF A CRASH.

Remedy: A REMEDY IS NOW AVAILABLE. DEALERS WILL INSPECT THE LATCH FOR PROPER OPERATION, AND CLEAN AND LUBE AS NEEDED, OR REPLACE THE SECONDARY LATCH IF IT IS NOT FULLY FUNCTIONAL, AT NO COST TO THE OWNER. IN ADDITION, DEALERS WILL NOW INSTALL A NEW HOOD RELEASE LEVER SPRING AND AFFIX AN UNDER-HOOD LATCH-MAINTENANCE WARNING LABEL TO ANY VEHICLES AFFECTED BY THIS VOLUNTARY SAFETY RECALL CAMPAIGN. AN OWNER'S MANUAL ADDENDUM CARD WITH INSTRUCTIONS ON HOW TO LUBRICATE AND MAINTAIN THE SECONDARY HOOD LATCH WILL ALSO BE MAILED TOGETHER WITH THE CUSTOMER NOTIFICATION. THE REPAIR SHOULD TAKE LESS THAN ONE (1) HOUR TO COMPLETE. THE DEALER MAY REQUIRE THE VEHICLE FOR A LONGER PERIOD OF TIME BASED UPON THE DEALER'S WORK SCHEDULE.

Glossary

Damage Indicator

Damage can be a result of many different types of events. Examples include contact with objects (other cars, trees, traffic signs, road debris, etc), vandalism, or weather-related events. Not every damage event is reported to CARFAX. As details about the damage event become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 5/12/26 at 3:09:35 PM (CDT). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Damage Severity

Damage events result in one of the following severity levels:

- Minor: Generally, minor damage is cosmetic (including dents or scratches), may only require reconditioning, and typically does not compromise a vehicle's operation and/or safety.

- Moderate: Moderate damage may affect multiple components of the vehicle and may impair the vehicle's operation and/or safety.
- Severe: Severe damage usually affects multiple components of the vehicle and is likely to compromise the vehicle's operation and/or safety.

CARFAX recommends getting a pre-purchase inspection at a certified collision repair facility.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Service Campaign

Automobile manufacturers issue a service campaign to address product technical issues that may not be related to safety or emissions standards. These issues are typically customer satisfaction initiatives.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
